

# Column filter in browser tables returns exact matches only

ISS-527 · Searcher · Verified 27 Jun 2026 14:32 UTC · qa.stds4you.jnj.datasdrapps.com · v5.0.0-rc.3

**PASSED**

Partial column filters on Browser search tables accept substring matches and behave consistently with catalog search for the reported issue.

<b>Issue</b>	ISS-527
<b>Result</b>	Passed
<b>Verified on</b>	27 Jun 2026 14:32 UTC
<b>Environment</b>	qa.stds4you.jnj.datasdrapps.com
<b>Release</b>	v5.0.0-rc.3
<b>Role</b>	Searcher

## WHAT WAS VERIFIED

A Searcher runs a Browser search, opens the results table, applies a column filter with a partial text value, and confirms matching rows appear — not only rows with an exact string match.

- Partial filter text returns all rows that contain the value.
- Filter clears correctly and restores the full result set.
- Browser table filtering matches catalog search behaviour.

## STEPS PERFORMED

1. Signed in as Searcher on the QA environment.
2. Ran a Browser search that returns multiple standards in the table.
3. Applied a column filter using part of a standard title (not the full text).
4. Confirmed all expected partial-match rows remain visible.
5. Cleared the filter and confirmed the full result set returns.

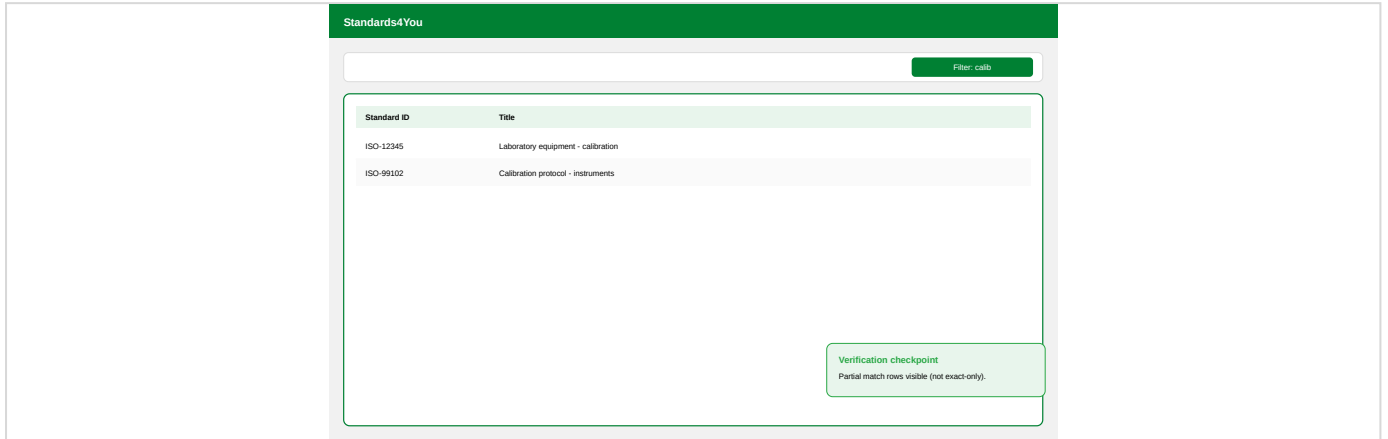

## SCREENSHOTS

### Step 2

#### Browser search results table before filtering

Browser search results — table ready for column filter.

### Step 3

Standards4You

Filter: calib

Standard ID	Title
ISO-12345	Laboratory equipment - calibration
ISO-99102	Calibration protocol - instruments

Verification checkpoint  
Partial match rows visible (not exact-only).

Partial filter applied — matching rows remain visible.

### Step 5

#### Verification completed successfully

Automated verification completed successfully.

## NOTES

This page shows sample verification layout and copy for ISS-527. Screenshots are illustrative placeholders until the next successful QA run replaces them automatically at this same URL.
